

**Anatoly Kulakov** 

# The Metrix has you...

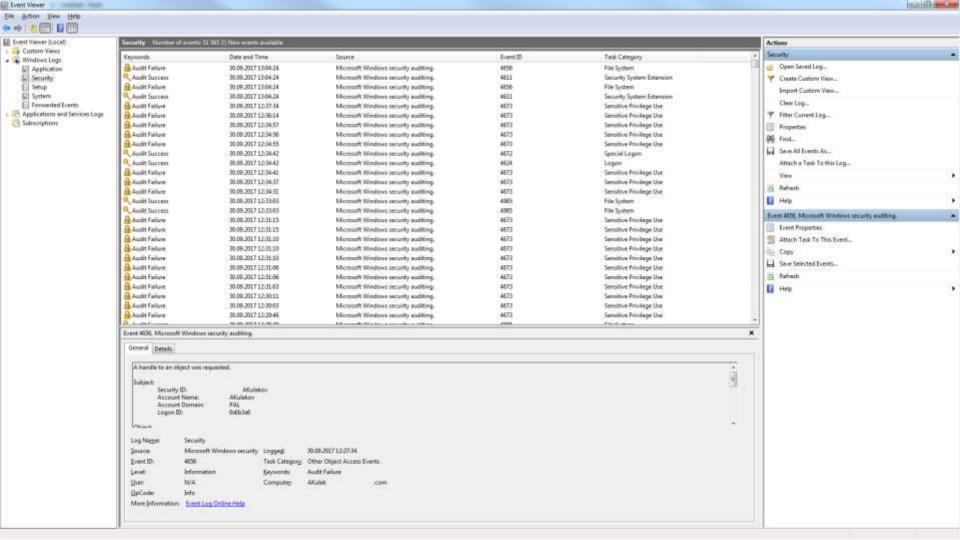

## Why metrics?

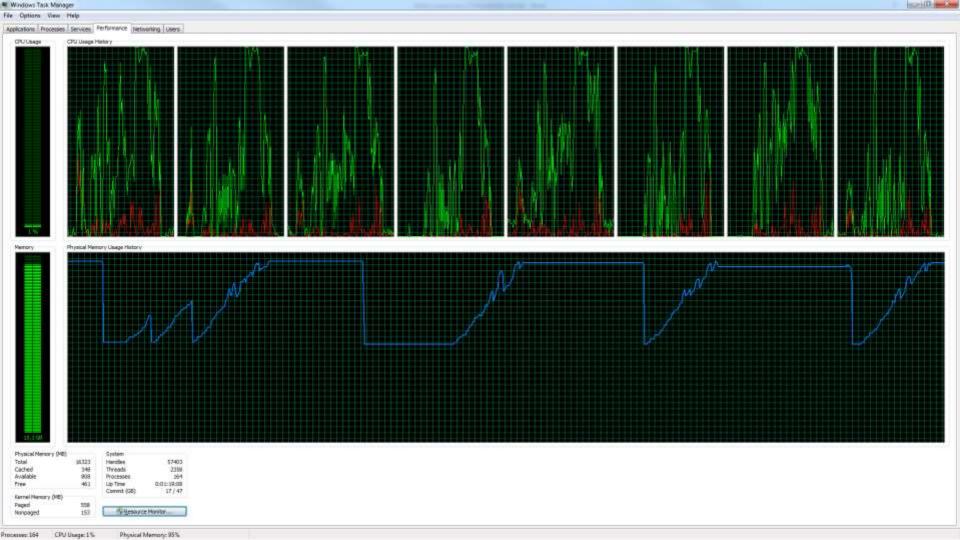

- Troubleshooting & Remediation
  - Where did the problem occur?
- Performance & Cost
  - How my changes impact overall performance?
- Learning & Improvement
  - Can I detect or prevent this problem in the future?
- Trends
  - Do I need to scale?
- Customer Experience
  - Are my customers getting a good experience?

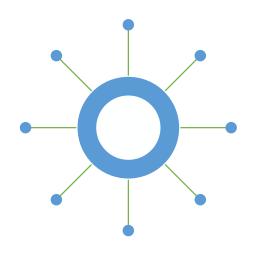

#### **Structured Logging**

200 hosts

**100** measurements

every 10 sec

× **86 400** seconds in a day

172 800 000 points per day

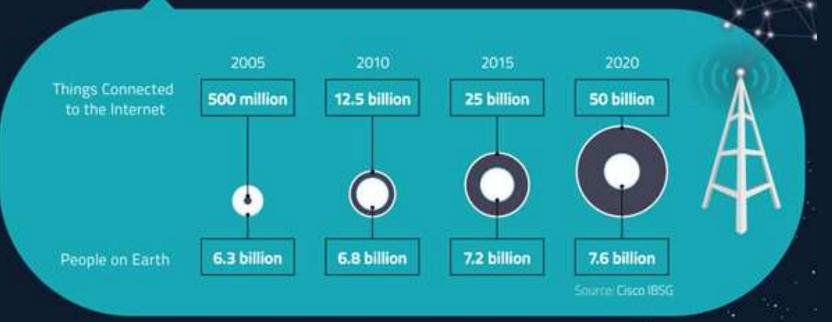

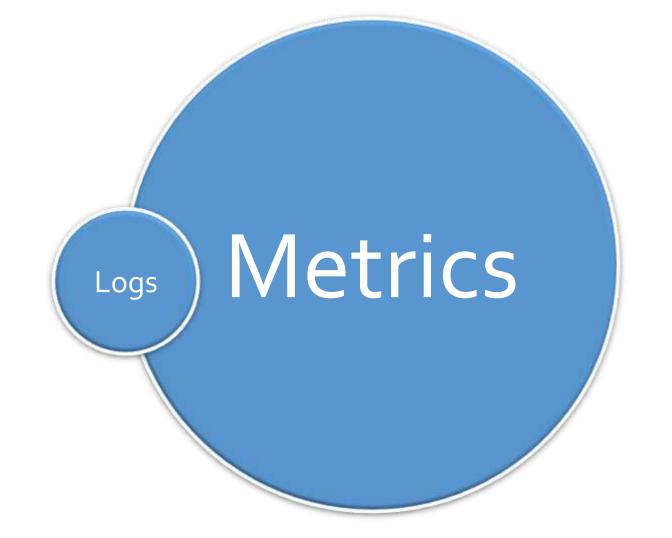

By 2020, there will be

## 50 billion devices

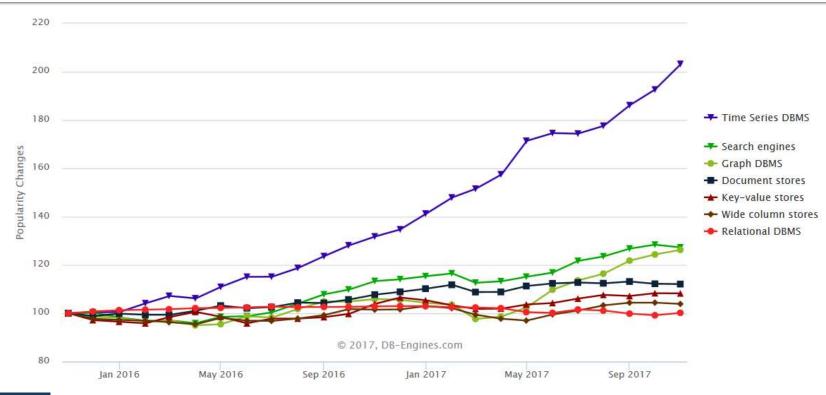

connected to the internet.

https://www.i-scoop.eu/internet-of-things-guide/

## DBMS by model popularity

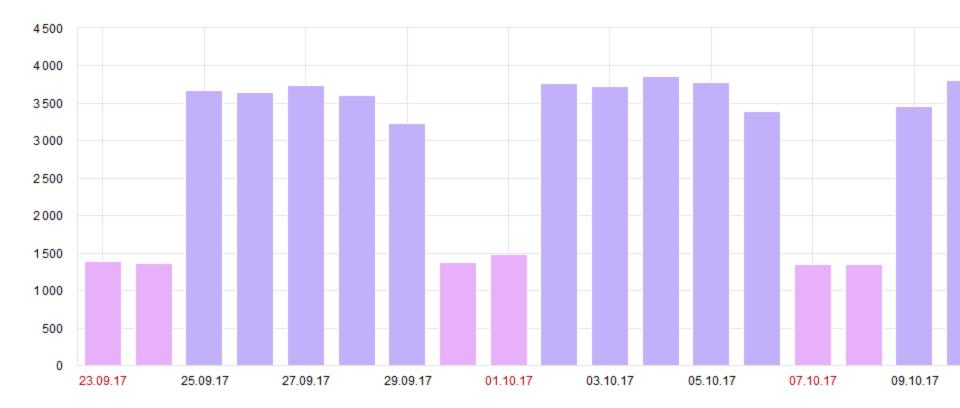

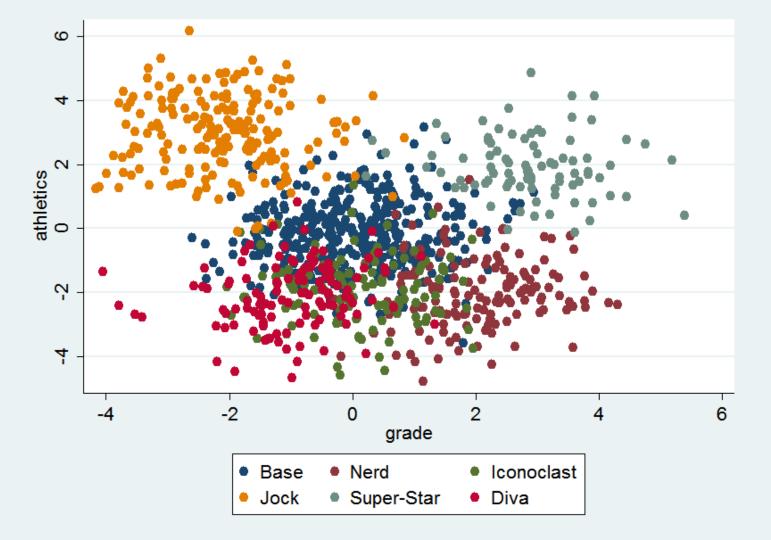

#### Посещаемость

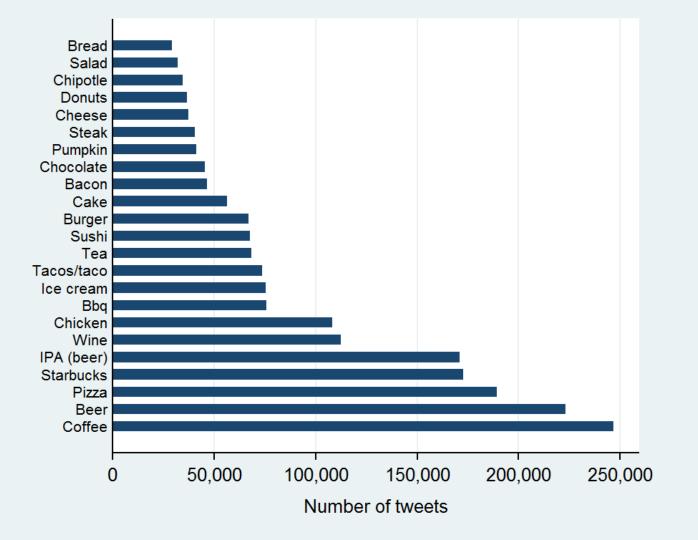

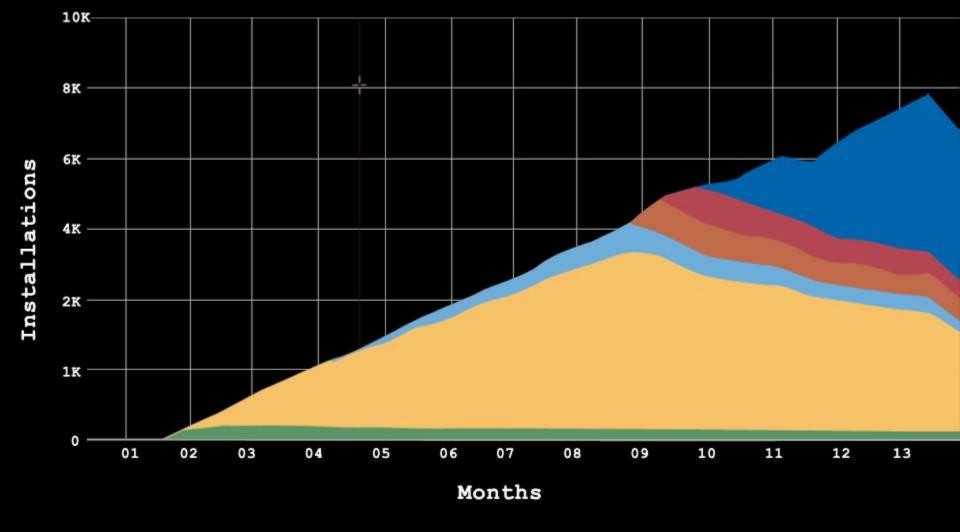

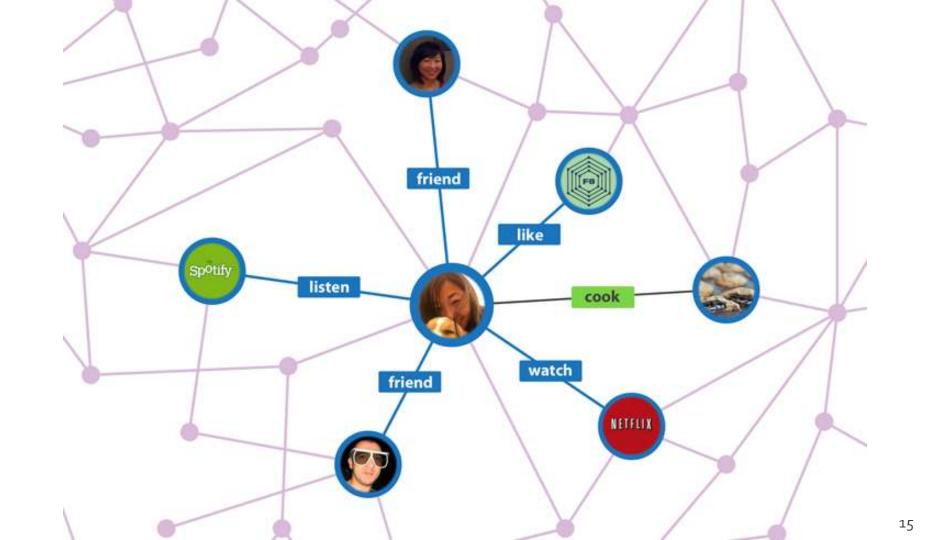

#### Визиты

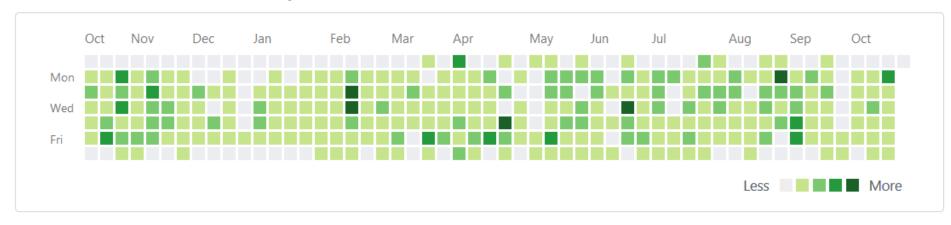

#### 2,271 contributions in the last year

## **Time Series structure**

#### Network

Timestamp

2017-11-12T06:42:17

2017-11-12T06:43:18

Tags

host = **dev** if = **eth1** 

host = dev if = wlan1 **Fields** 

rx = **42** 

tx = **10** 

rx = **50** 

tx = 88

# Time Series analogy

#### Network

Timestamp

**Primary Key** 

Tags

**Indexed Column** 

Fields

**Not Indexed Column** 

## Time Series size

#### Network

Timestamp

DateTime

8 bytes

2017-11-12T06:42:17

Tags

string[]

≈ **24** bytes

dev, eth1, ...

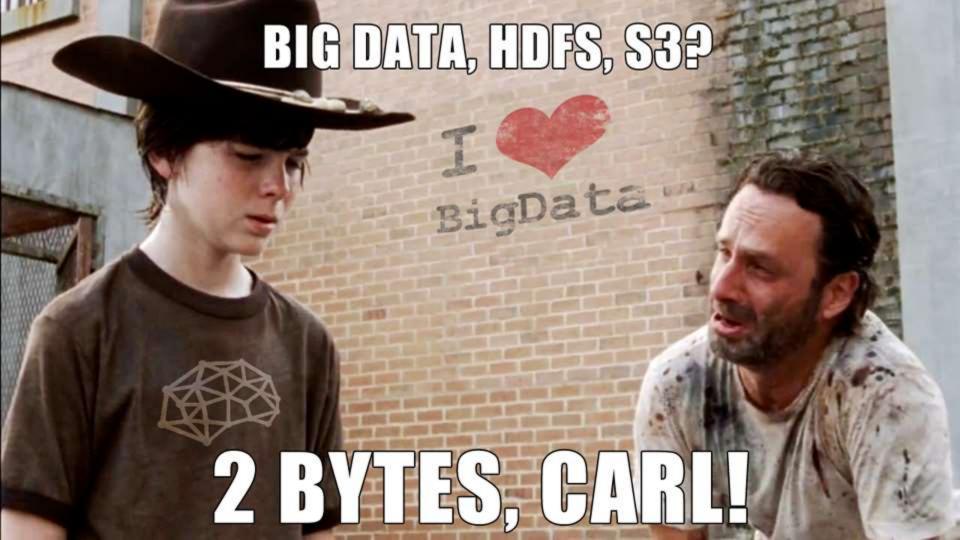

Fields

double

8 bytes

42.0173, 1.0, ...

# bzip2

## **Series**

#### Network

Tags

host = **dev** if = **eth1** 

host = **dev** if = **wlan1** 

network,host=dev,if=eth1

network,host=dev,if=wlan1

## **Timestamp**

	<u>Delta</u>	Delta 2
2017-11-12T06:00: <b>00</b>	-	-
2017-11-12T06:00: <b>05</b>	05	-
2017-11-12T06:00: <b>10</b>	05	0
2017-11-12T06:00: <b>15</b>	05	0

«We have found that about **96%** of all time stamps can be compressed to a **single bit**.»

Dalla

## **Fields**

#### Decimal

15.5

14.0625

3.25

8.625

# **Fields**

Decimal	Double Representation
15.5	0x402f0000000000000
14.0625	0x402c2000000000000
3.25	0x400a000000000000
8.625	0x4021400000000000

## **Fields**

15.5       0x402f00000000000         14.0625       0x402c200000000000       0x000320000000000         3.25       0x400a00000000000       0x00262000000000         8.635       0x403140000000000       0x003b4000000000	Decimal	Double Representation	XOR with previous
3.25 0x400a0000000000 0x002620000000000	15.5	0x402f0000000000000	
	14.0625	0x402c2000000000000	0x00 <mark>0320</mark> 00000000000
8 62	3.25	0x400a000000000000	0x00 <mark>2620</mark> 00000000000
0.025	8.625	0x40214000000000000	0x002b4000000000000

«Roughly 51% of all values are compressed to a single bit»

«... compress time series to an average of 1.37 bytes per point»

### Time Series sources

- Performance Counters
- Third party statistics API
- Event Tracing for Windows
- Application measurements

# **Telegraf Integrations**

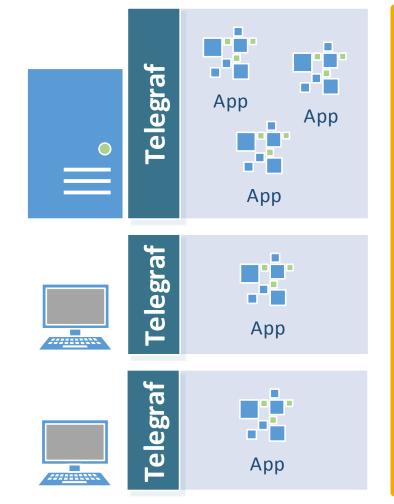

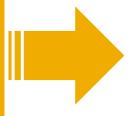

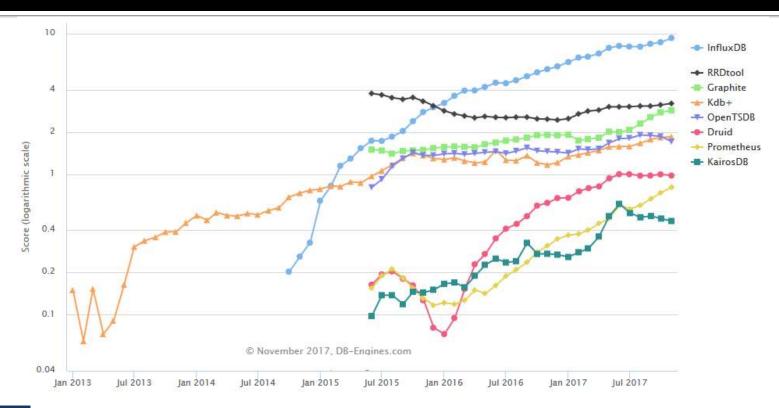

## Time Series DBMS Popularity

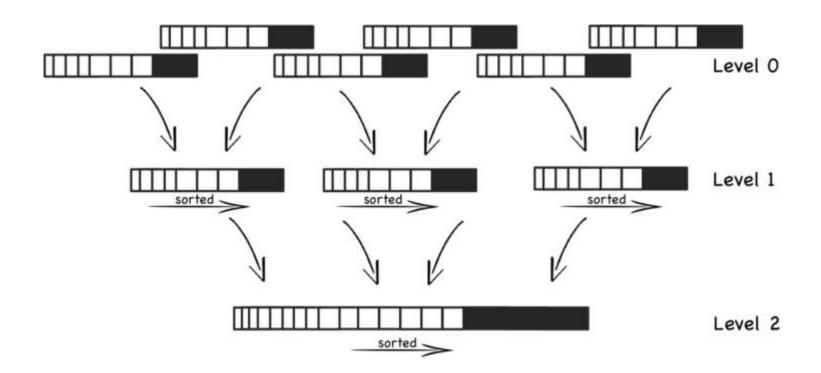

## Specifics of the workloads

- Billions of individual data points
- High write throughput
- High read throughput
- Large deletes (data expiration)
- Mostly an insert/append workload, very few updates

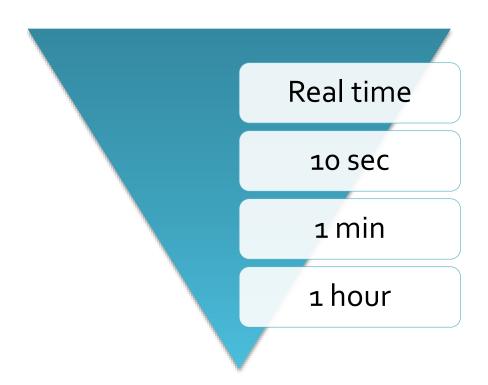

# Time-structured merge-tree

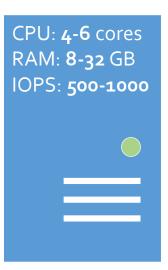

## InfluxQL

```
SELECT median(rx), mean(tx)
FROM network
WHERE time > now() - 15m
  AND host = 'dev'
GROUP BY time(10s)
```

# Retention policies

# Single node performance

# Single node performance

CPU: **4-6** cores RAM: **8-32** GB IOPS: **500-1000** 

Load	Field writes per second	Queries per second	Unique series
Low	< 5 thousand	< 5	< 100 thousand
Moderate	< 250 thousand	< 25	< 1 million
High	> 250 thousand	> 25	> 1 million
Infeasible	> 750 thousand	> 100	> 10 million

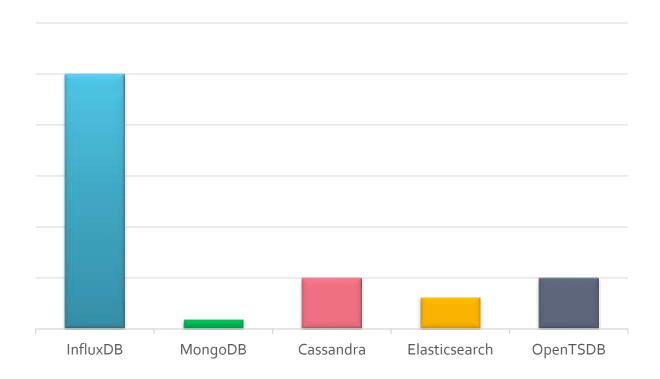

## **Mortal Kombat**

#### Write Performance

#### InfluxDB outperformed:

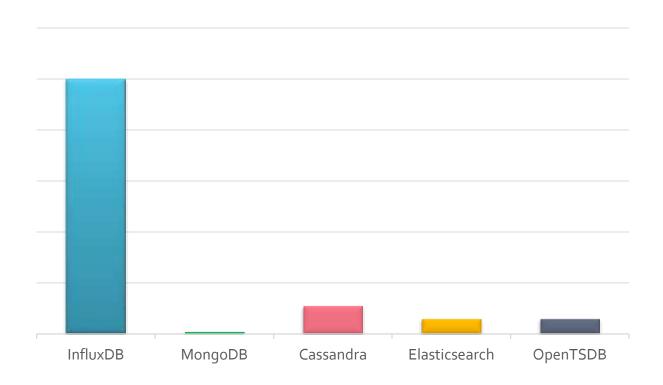

- MongoDB by 27x
- Cassandra by 5x
- Elasticsearch by 8x
- OpenTSDB by 5x

#### Compression

#### InfluxDB outperformed:

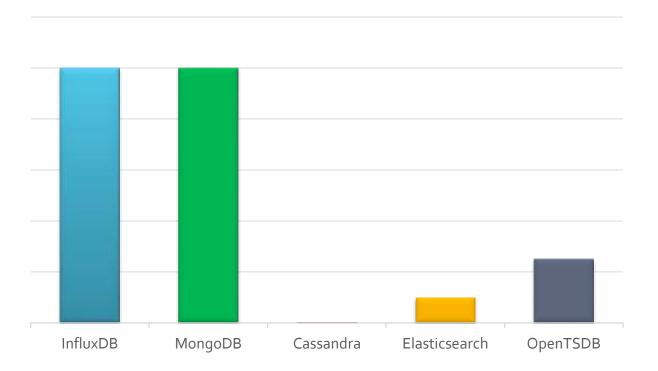

- MongoDB by 84x
- Cassandra by 9x
- Elasticsearch by **16**x
- OpenTSDB by 16x

#### **Query Performance**

#### InfluxDB outperformed:

- MongoDB similarly
- Cassandra by **168**x
- Elasticsearch by **10**x
- OpenTSDB by 4x

# DEMO POWERED BY

## First Step

- Install <u>Telegraf</u> and <u>Dashboard</u>
- Install <u>AppMetrics</u> and <u>Dashboard</u>
- Use it
- Remove unnecessary metrics
- Add new application-specific metrics

### Demo powered by

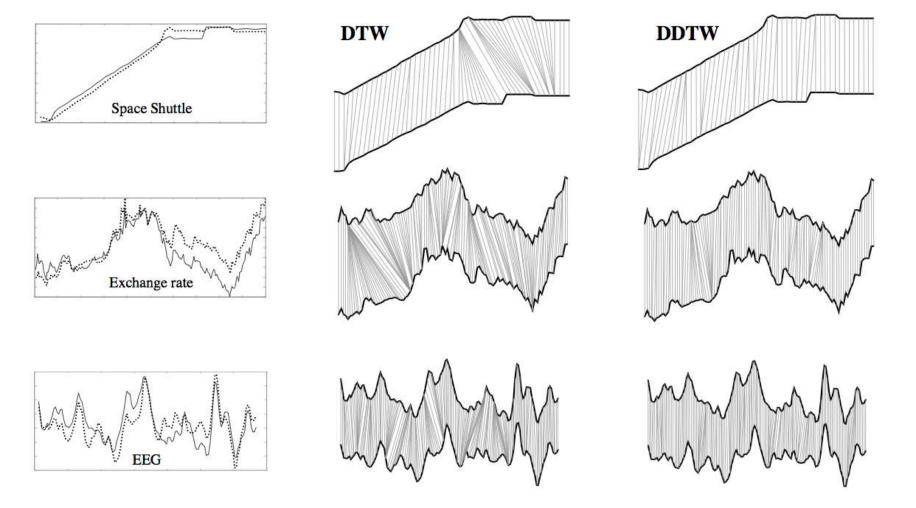

# **Benchmark Dot Net**

Powerful .NET library for benchmarking
